Social Responsibility

Social responsibility, humanity, respect for workers, consumers, and the natural environment are the pillars underlying the values of the company FLEXIA-GEORGIOU FLEXIBLE PACKAGING S.A. since 1969.

We are engaging in efforts on a daily basis, in order for the impact of our actions and activities on local and national society, the environment, the products that we produce, and the people directly or indirectly involved in the operation of our Company to be characterized by respect, quality, humanism, progress, and sustainability. The conviction of the management of our Company is that a successful course for the company will have no meaning if it is not combined with improvement of the way of life of the people supporting it, as well as the sustainability of the ecosystem.

Social Action

We recognize our responsibility toward local and national society and we orient our action in order to:

- Maintain the cooperation and trust with local society and its members that we have built many years ago
- To provide the Social Grocery Stores of the Municipalities of Oropos and Tanagra with packaging bags and garbage bags.
- To cooperate with local associations (sports, folklife), thus strengthening their events through sponsorship.
- To cooperate with research centers and educational institutions for the promotion of knowledge.
- To make our facilities available for visits by schools from the Municipalities of Oropos and Tanagra, so that the students will be guided, become familiar with the production process, and be informed about the correct use of plastic and flexible packaging.
- We offer sponsorships and materials (bags, gloves) to the Hellenic Maritime Environment Protection Association (HELMEPA) and we participate with the personnel of our company and their families in the voluntary cleaning of the coastline all over Greece.
- We provide bags for the conferences of the Greek Mathematics Society, the Panhellenic Educational Robotics Competitions, as well as the Panhellenic Student Chess Championship.

- Our company has joined SEDEX (Supplier Ethical Data Exchange). The pillars upon which SEDEX bases the certification of its members are technical knowledge and quality control, health and safety, and ensuring rights and ethical rules in the working environment. Membership in SEDEX allows our company to share the elements of social responsibility that concern it with the product and service supply chain with which it works.
